In a few years time, the ever-growing techno mice generation will be introduced. Older rodents will be hunted down, replaced, and soon the new-dawn rat pack will emerge. The future is the G20 Glaser Mouse. It has a cool subtle, minimal look with a soft-glow on its top and sides, while cordlessly running amuck. The perfect companion to surf future computing clouds with.

## EVERIO HD GZ-HD320

**RMTBA**

The leader, the main event, the showstopper... it's certainly no mean feat to be the flagship model of JVC's new Everio lineup. But the HD320 has stepped up to the plate, amicably. The HD320, in its serious Onyx black form, packs a hefty 120GB built-in HDD and welcomes microSD/SDHC cards on the side. Why so much space? Well it shoots in pixel-perfect HD 1920x1080 quality so you will run out, eventually. And considering it's also one of the tiniest HDD corders available now, we reckon we'd be toting this palm-sized shooter to town very often.

**Canon IP4680 Photo Printer RM508**

We usually won't bat more than an eyelid when printers shuffle through the doors here at Stuff Towers, except for this time when a cute little snazzy photo printer, tagged as the IP4680, dropped right in and onto our desks. It's pretty enough to sit there motionless, but the true fun begins when we powered it on and hooked it up via USB plug-and-print to the nearest digicam we could find. Let the printing begin!

**FASHION PREDATOR Crocodile Watch CR2904 RM395**

03 9287 6188 | [www.crocodile.com.my](http://www.crocodile.com.my)

Always in scaly style, the leather-strapped tick-tocker grunts with cool, manly suaveness and slithers smoothly in keeping up with the times. Naturally sleek, this timekeeper is encased in solid stainless steel and dons rose gold plating for added pizzazz. It reeks not of crocodile saliva but subtle, raw predatory instincts, perfect for getting ladies weak in the knees.

**TOASTING THE PORT HEAD Sensonic Nano USB RM35 (4GB), RM65 (8GB)**

03 8023 3800 | [www.sensonic-global.com](http://www.sensonic-global.com)

In the calculative world where every millimetre is taken into account, Sensonic takes the toast by showcasing their littlest 4GB USB drive. Missing the usual body portion, this Nano is all head, USB port head that is. When plugged-in, it sticks out like a 5pm stubble and is barely noticeable, not to mention less susceptible to clashing with other muscly USBs.
